

# Boost Your Manufacturing with INTERA XVisor AI Vision Accelerator

Real-time AI-powered computer vision at the edge made for smart factories.

## XVisor AI Vision Accelerator

- Ultra-fast AI inference for machine vision
- Defect detection, quality control & predictive maintenance
- Low power, compact edge deployment
- Seamless integration with existing cameras & PLCs

Transform your production line today.

## Why Manufacturers Choose INTERA XVisor

**Higher Accuracy** — Detect even microscopic defects in real time.

**Increased Throughput** — Reduce false rejects and downtime.

**Lower Costs** — Edge AI means no heavy cloud dependency.

**Easy Integration** — Works with your existing industrial cameras and automation systems.

**Power Efficient** — Optimized for 24/7 factory floor operation.

**Scalable** — From single production cells to full smart factory deployment.

### Technical Highlights

- Advanced AI acceleration optimized for vision neural networks
- Real-time performance for high-speed manufacturing lines
- Robust industrial-grade design
- Supports leading vision frameworks

*“XVisor has increased our visual inspection accuracy by over 40% while cutting inspection time in half.”*

— Production Manager, at BANDALUX
